## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 – 18, drawn to the process of making, classified in class 438, subclass 400.
  - II. Claims 19 – 21, drawn to the product made, classified in class 257, subclass 1+.
2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product made could be formed by isotropically etching a dielectric layer in multiple steps to create horizontal air cavities in support of a metal inductor.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
